Our Mission

Our mission is to produce world-class software components that enable developers to produce quality software for the most demanding of environments. Our innovative libraries are designed to be extensible to ensure maximum benefit to customers. We provide full source code to enable seamless integration of our libraries with our customers' projects. We firmly believe that our success is closely tied to that of our customers. To help our customers succeed, we strive to offer technical support that is accessible, accurate, and fast.

Our efforts are currently focused on Windows Forms, ASP.NET, WPF & Silverlight components for the Microsoft .NET platform.

Details about Syncfusion's products are available at <http://www.syncfusion.com>.

About Syncfusion, Inc.

Syncfusion was founded by industry experts in 2001 and originally settled into offices in Cary, NC. After its founding, all of Syncfusion's products were built from scratch in 100% C#. Syncfusion provides software components and tools for the .NET platform, and leads the market with the broadest range of software components and tools for building applications on the Microsoft .NET platform. In 2003, Syncfusion expanded our offices to a larger location in Morrisville, NC, where our home office is currently located. Syncfusion continues to be a transparent company that publishes feature and bug requests online. Syncfusion provides our components in C#, and also provides samples in VB.NET. Many of the most influential Fortune 500 Companies use Syncfusion's product, Essential Studio, to save time and money. Syncfusion provides the dedicated resources needed to maintain and further develop our software components.

Syncfusion can be reached at (919) 481-1974 or on their website at:
