

Essential Chart

This component has a strong business orientation, is easy to use, and provides stunning charts. It contains 37 unique 2-D and 3-D chart types ranging from simple column charts to specialized financial charts. All are highly customizable and have a powerful data model that makes data-binding simple.

Platforms Supported:

- ASP.NET
- ASP.NET MVC
- WPF
- Silverlight
- Windows Phone 7
- Windows Forms
- Mobile MVC

Features:

Real-Time Charts—Optimized to deal with real-time data, our chart control can render any type of dynamic chart. This highly optimized implementation allows you to visualize real-time updates with zero latency.

Financial Chart Types—With all the major financial charts at your disposal—including Kagi, Renko, box-and-whisker, and the hi-lo gamut—you'll be building meaningful, data-driven charts at the flick of a switch.

Essential Chart

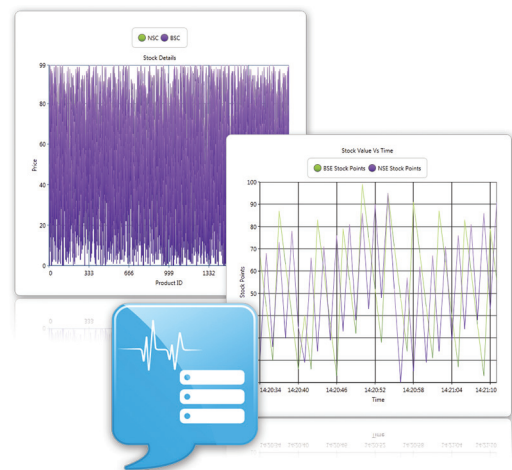

We have been using Essential Chart WPF for almost a year now. We have been impressed with the flexibility and the ease-of-use of the component. Syncfusion has been extremely helpful both during and after the evaluation process."

Koray Y, USA

Technical Analysis—Forecast future movements by running additional formulas on raw data—a great way to predict future market trends and stay ahead of them.

Data Flow—Seamlessly handle and visualize large sets of data points with a built-in data-grouping engine that allows you to browse data views without stalling.
