

A complete suite of ASP.NET MVC controls designed specifically for mobile devices. Use Essential Tools to implement professional, high-speed user interface components such as menus, toolbars, sliders, scroll panels, rating controls, and progress bars; or use Essential Chart to visualize any type of data in visually stunning, fully customizable charts. Enhanced with HTML 5, our Mobile MVC controls can be used to provide extensive user interactivity and the fastest performance possible in your Web apps.

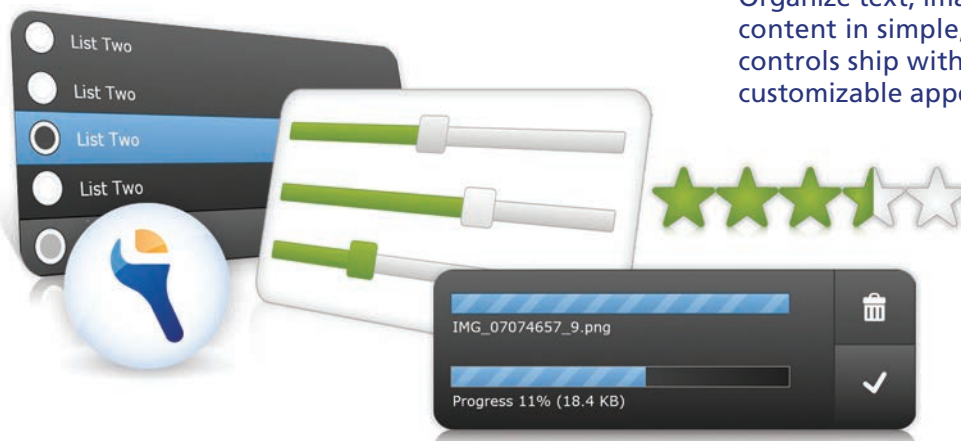

Develop Once, Deploy Anywhere

Mobile MVC is your gateway to the mobile market. With a single code base, you can develop and deploy your apps on any device running Windows Phone, Android, iOS, or BlackBerry operating systems.

Dialogs, List Boxes, Tabs, Scroll Panels, and More

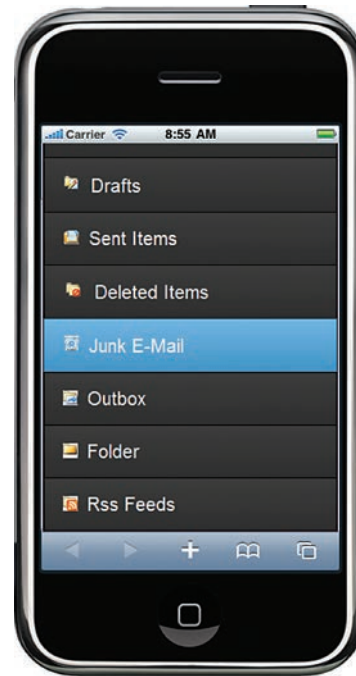

Organize text, images, and virtually any other content in simple, uncluttered UIs. All these controls ship with built-in skins for instantly customizable appearances.

Mobile MVC

Unparalleled Interactivity

Give your end users the control they demand by implementing dynamic, interactive features in your mobile apps. Our slider and rating controls are enhanced with the high performance and interactivity enabled by HTML 5.

Professional Charts

Constructed with the HTML 5 CANVAS element, Essential Chart for Mobile MVC allows you to easily create a wide array of stunning, professional charts that can be used to make any type of data easily accessible and understandable.
