

Corporate Fact Sheet

Summary:

Syncfusion is the enterprise technology partner for developers on every Microsoft platform, delivering the broadest range of .NET components and controls coupled with a service-oriented approach throughout the entire application lifecycle. Offering the fastest high-performance Silverlight and WPF grid on the market and quarterly product updates – Syncfusion is trusted by developers worldwide for use in mission critical applications.

Syncfusion's **Essential Studio Enterprise Edition** provides the most comprehensive suite of components and controls for .NET, enabling developers to create rich applications, and integrate business intelligence analysis and reporting solutions with ease – even in the most demanding of environments. Enterprise Edition is made up of **Essential Studio User Interface Edition**, **Reporting Edition**, and **Business Intelligence Edition**, including the first 100% RDL-compatible WPF and Silverlight report viewer.

Key Highlights:

Flexibility and maintainability:

Geared toward long lifecycle applications and architected to meet high standards for flexibility and maintainability.
