

Hi Mate,

Thank you for contacting Syncfusion support.

We have prepared a sample to meet your requirement. In this, we have done the following.

1. Selected all text from **RichTextBox** as **RTF**.
2. Loaded RTF as Stream using DocIO.
3. Converted loaded Word document into PDF using *Essential DocIO and Essential PDF*.

Please find the below sample which illustrates the same. Please let us know if it helps you.

If we misunderstood any of your requirement, then kindly provide us your sample or modified above sample and screenshot/output Word document of the expected result along with input which will be helpful to provide you the appropriate solution.

Please let us know if you have any other questions.

Regards,
Sethumanikkam.Y
