

**“Update your graph  
when you want.”**

**It's a long time between rates notices,  
so how about keeping track by taking a meter reading  
from your home and entering it into the system? Our  
graph can combine readings from both your rates  
notices and the ones you take yourself. It means that  
you can keep track of your consumption regardless of  
when you get your rates notice.**
