Giving FullTrust to Syncfusion Assemblies:

The Syncfusion assemblies can be given FullTrust as follows.

1) Open the ControlPanel -> Administrative Tools. The page will look like this as shown in the fig.3.

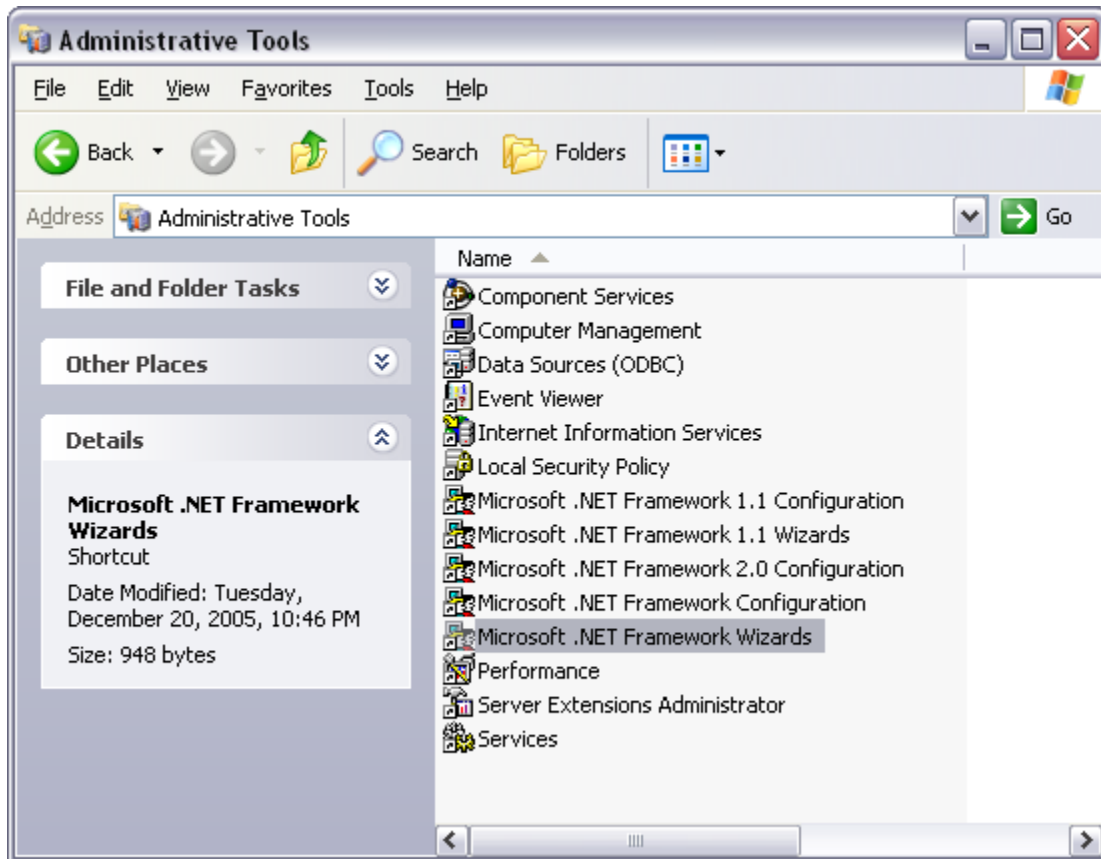

Fig.1. AdministrativeTools

2) Select the Microsoft .NET Framework Wizards. This wizard contains the applications for changing the Security level to the required applications. The wizard will look like the one shown below,

Fig.2. .NET Wizards

3) Click on the Adjust .NET Security application. The wizard will open a dialog that enables the user to make changes for the All the users or the current user. Select Allusers and then press 'Next'.

4) A dialog as shown will appear. In that please adjust the security level for the 'LocalIntranet', 'Internet' and the 'Trusted Sites' to FullTrust.

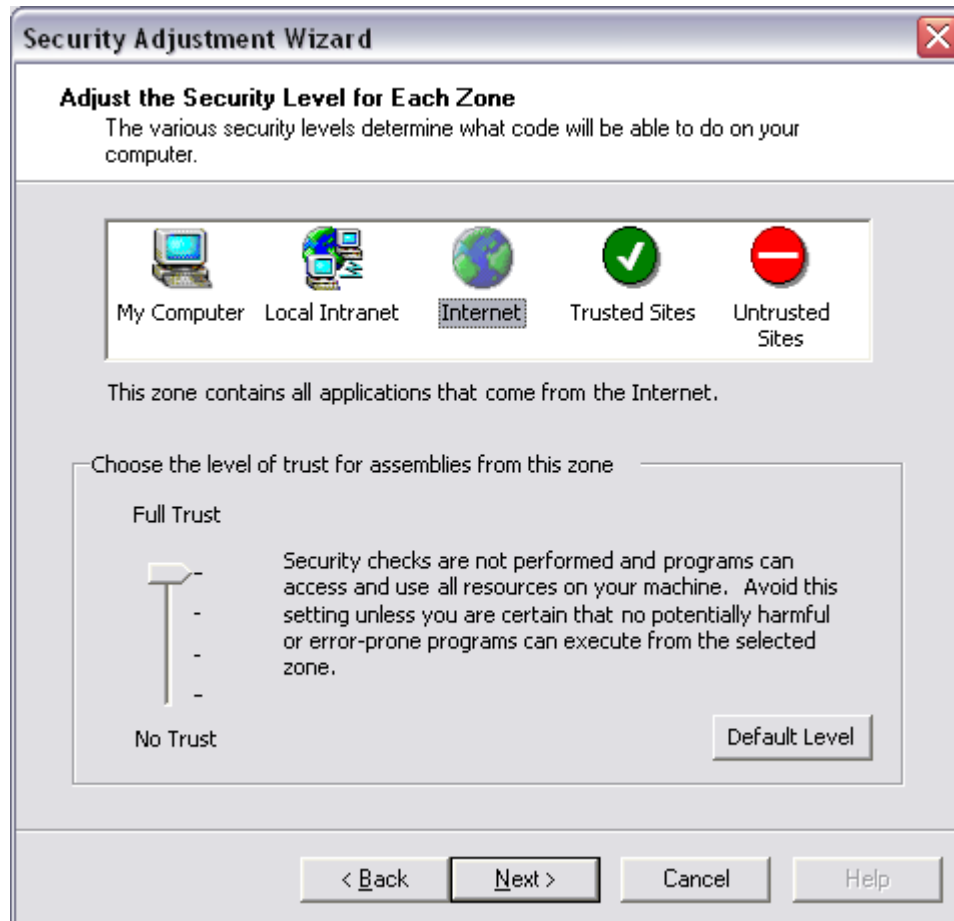

Fig.3. Adjust Security Level.

5) The Next page will show the summary of the Security Adjustment Wizard settings (fig.6.). Click finish to make these settings effective.

Security Adjustment Wizard

Completing the Wizard
Click Finish to make the changes listed below.

Summary of changes:

Zone	Security Level
My Computer	Full Trust
Local Intranet	Full Trust
Internet	Full Trust
Trusted Sites	Full Trust
Untrusted Sites	No Trust

The security policy will be changed to reflect these settings.
