

Move beyond simply coding applications to delivering business innovation with Syncfusion's award winning .NET components and JavaScript libraries. Syncfusion tools help developers create elegant user interfaces, business intelligence dashboards, and sophisticated reporting that today's business users need, in the formats they demand.

# SYNCFUSION ESSENTIAL STUDIO ENTERPRISE EDITION

Essential Studio is the most comprehensive suite of enterprise components available for web, desktop, and mobile development. That is why Syncfusion controls are trusted by developers worldwide for use in mission-critical applications.

# PRODUCT DETAILS

High-performance components for web, desktop, and mobile.

**Platforms :** ASP.NET Web Forms, ASP.NET MVC, JavaScript, LightSwitch, Silverlight, Windows Forms, WPF, WinRT, Windows Phone, Xamarin, Android, iOS

**Price :** \$995 per platform\*/\$1,995 all platforms (binary)/\$2,495 all platforms (source)

\*Platform prices vary

WEB

Dozens of lightweight, high-performance controls for building responsive web apps.

**Essential Studio for ASP.NET**    Enterprise-class library with more than 40 unique controls, compatible with Knockout.js and Angular.

Grids	Tree grid for organizing hierarchical data, and a powerful data grid with support for data binding, editing, filtering, grouping, and much more.
Chart	High-performance charting component with more than 30 chart types, including specialized financial charts.
Gauges	Radial, linear, and digital gauges for visualizing alphanumeric information.
Diagram	Build static, data-bound diagrams as well as Microsoft Visio-like interactive diagrams.
File Formats	Libraries for reading and writing Excel, PDF, PowerPoint, and Word documents. Also includes a PDF viewer component.
Business Intelligence	Pivot grid, chart, and gauge controls for visualizing large volumes of OLAP data.
Schedule	A highly customizable Outlook-like scheduler control.
Navigation	Office-style ribbon, accordion, tree view, toolbar, rotator, and list box controls.
Editors	Rich-text editor, autocomplete, masked text box, rating, split button, color picker, date-time pickers, Captcha, and more.
Report Viewer	Visualization component for viewing Microsoft SRSS RDL/RDC files on webpages.
Gantt	Project management component featuring intuitive chart and table views.
Layout	Dialog and splitter controls for coherently arranging content in webpages.
Notification	Waiting pop-up and progress bar controls to notify users of ongoing processes.

**Essential Studio for ASP.NET MVC**

More than 70 unique controls powered by HTML 5, supported in all major browsers.

Grids	Lightweight, high-performance data grid with support for hierarchies, grouping, and more. Capable of handling millions of records.
Chart	Visually stunning charting component featuring more than 30 chart types and complex technical indicators.
Gauges	Radial, linear, and digital gauges for visualizing alphanumeric information.
Diagram	Diagramming component that features customizable connection ports, nodes, connectors, groups, algorithmic layouts, and much more.
File Formats	Libraries for reading and writing Excel, PDF, PowerPoint, and Word documents. Also includes a PDF viewer component.
Business Intelligence	Pivot grid, chart, and gauge controls for visualizing large volumes of OLAP data.
Report Viewer	Visualization component for viewing Microsoft SRSS RDL/RDC files on webpages.
Schedule	A highly customizable Outlook-like scheduler control with data binding support.
Navigation	Office-style ribbon, accordion, tree view, toolbar, navigation drawer, radial menu, and rotator controls.
Editors	Rich-text editor, autocomplete, slider, masked text box, rating, split button, color picker, date-time pickers, upload box, and more.
Range Navigator	Interface control for selecting a range of information from a larger collection.
Gantt	Project management component featuring chart and table views.
Layout	Dialog, splitter, file explorer, list view, and tile view controls for coherently arranging content.
Mobile	Many of the ASP.NET MVC controls are optimized for use in mobile applications.

**Essential Studio for JavaScript**

The first JavaScript control framework for line-of-business applications, featuring more than 80 controls.

Chart	Create diverse charts with multiple axes, customizable data symbols, and exceptional user interactivity.
Gauges	Linear, radial, and digital gauges for displaying alphanumeric information.
Grids	Feature-rich data grid and tree grid with support for grouping, data binding, and filtering.
Diagram	Create custom diagrams by positioning shapes using built-in layouts or build them from scratch.
Data Manager	Unique control for working with local and remote data.
Tree View	Present hierarchical data with customizable icons, check boxes, and more.
Editors	Rich-text editor, autocomplete, slider, masked text box, rating, split button, color picker, date-time pickers, upload box, and more.
Gantt	Schedule and manage projects in this Microsoft Project-like viewer and editor.
Schedule	Manage appointments with numerous features, including time zone settings, view customization, and localization.
Bullet Graph	Control for plotting actual values over goals, similar to a linear gauge or bar chart.
Navigation	Accordion, toolbar, Office-like ribbon, navigation drawer, and radial menu controls.
Mobile	Many of the JavaScript controls are designed specifically for use in mobile applications.

**Essential Studio for Silverlight** Set of more than 100 controls to help you build rich, high-performance web-based applications.

Grid	One-of-a-kind cell-oriented grid, tree grid, data grid, and property grid.
Chart	High-performance charting component with more than 45 chart types, including sparklines and advanced financial charts.
Gauges	Radial, linear, and digital gauges for displaying alphanumeric information.
Business Intelligence	Controls for performing slice-and-dice analysis of OLAP and relational data, as well as building BI dashboards.
Report Viewer	RDL report viewer component to help you render reports within your applications.
Spreadsheet	The only way to view and edit Excel files within your apps in a rich, Office-like UI.
Diagram	Create Microsoft Visio-like diagram building applications as well as dynamic, data-driven flow charts and hierarchies.
Maps	Map control with support for layers, zooming, and more that enables you to source maps from Bing Maps, OpenStreetMap data, and ESRI shapefiles.
Schedule	Microsoft Outlook-like scheduling control with support for templates, MVVM, themes, and more.
Gantt	Microsoft Project-like viewer and editor control for scheduling and managing projects.
Editors	Autocomplete, native type editors, combo boxes, drop-down buttons, rich-text editor, and many more.
Navigation	Build Office or Windows-like user interfaces with our ribbon, docking, radial menu, and other frameworks.

**Essential Studio for LightSwitch** Set of more than 25 control extensions for HTML and Silverlight clients.

Grid	Data grid with support for common functions like grouping, filtering, sorting, and resizing.
Chart	Visually stunning charting component that includes dozens of chart types and features support for multiple axes, drill-down operations, and data binding.
Gauges	Radial, linear, and digital gauges for displaying alphanumeric information.
Treemap	A simple but effective visualization for flat or hierarchical data.
Maps	Data visualization extension for articulating data as a map with support for GeoJSON shapes, layers, interactive zooming, and customizable layouts.
Report Viewer	Visualization control for viewing Microsoft SSRS RDL/RDLC files, powered by HTML 5 and JavaScript.
File Formats	Native components for exporting data to Microsoft Excel and Word file formats.
Editors	Easily capture user input through text boxes, rating control, sliders, and more.
OLAP Client	Efficiently browse and analyze multidimensional data from OLAP data sources.
Theme and Shell Extensions	Give your LightSwitch apps a uniform look, layout, and navigation experience.

## DESKTOP

Hundreds of high-performance controls that bring the modern Windows look to WPF and Windows Forms.

**Essential Studio for Windows Forms** Comprehensive suite of more than 110 unique controls to build enterprise-grade Windows Forms apps with a modern Windows look.

Grids	Our flagship Excel-like, cell-oriented grid control, a high-performance data-bound grid, a grid list, and a data-bound grid grouping control.
Chart	More than 40 visually stunning and easy-to-use charts with a powerful data model that makes data binding simple.
Gauges	Fully customizable radial, linear, and digital gauge controls for visualizing data.
Diagram	Fully-fledged Visio-like diagram building component that is also capable of dynamically generating workflows, flowcharts, hierarchies, and more.
File Formats	High-performance libraries to create and edit PDF, Excel, PowerPoint, Word, and other documents. Also features a PDF viewer component.
Business Intelligence	Pivot grid and pivot chart controls for analyzing and visualizing relational data.
Schedule	Microsoft Outlook-style control for adding rich scheduling capabilities to your applications.
Editors	Widest set of editors you will find anywhere, from autocomplete, to native data type text boxes and complex buttons.
Treemap	High-performance control for visualizing flat or hierarchical data with support for grouping, interactive legends, and automatic layouts.
Layout	More than a dozen controls for organizing content across tabs, folders, grids, ribbons, pop-ups, and more.
Notification	Tooltips, progress bars, status bars, splash panels, hub tiles, and more.
Syntax Editor	Powerful code editor component with support for syntax highlighting, IntelliSense, undo, redo, and more.
Maps	Powerful data visualization control that can be used to articulate data as a map.
Navigation	Build Office or Windows-like user interfaces with our ribbon, docking, radial menu, and other frameworks.

**Essential Studio for WPF** Comprehensive set of more than 100 WPF controls and libraries to help you create rich, performance-intensive Windows applications.

Grid	Data-bound grid with unmatched performance, unique Excel-like, cell-oriented grid and tree grids.
Charts	Over 45 chart types, including stacking charts, area charts, funnel charts, pie charts, and high-performance fast charts.
Gauges	Fully customizable linear, radial, and digital gauges for displaying numeric or qualitative data.
Business Intelligence	Grid, chart, client, gauge, and pivot grid controls for summarizing, analyzing, and exploring OLAP and relational data.
File Formats	Native WPF libraries to create and edit PDF, Excel, Word, and PowerPoint documents. Also includes a PDF viewer component.
Reports	RDL report designer, report viewer components, and an RDL processing library allow you to put together a complete custom reporting solution.
Spreadsheet	The only way to view and edit Excel files within your apps in a rich, Office-like interface.

Diagram	Create Microsoft Visio-like diagram building applications as well as dynamic, data-driven flow charts and hierarchies.
Maps	Map control with support for layers, zooming, and more that enables you to source maps from Bing Maps, OpenStreetMap data, or ESRI shapefiles.
Schedule	Microsoft Outlook-like scheduling control with support for templates, MVVM, themes, and more.
Navigation	Radial menu, tree navigator, group bar, hierarchical navigator, menu controls, and more.
Gantt	Microsoft Project-like viewer and editor control for scheduling and managing projects.
Editors	Autocomplete, native type editors, combo boxes, drop-down buttons, rich-text editor, and many more.
Layouts	Build interfaces with a familiar look and feel with our ribbon, docking manager, document container, and other frameworks.
Notification	Busy indicator, notify icons, and hub tiles for dynamic notifications.

## MOBILE

Stunning data visualization tools for cross-platform development with Xamarin, a sweeping set of controls for Windows phones and tablets, and native controls for iOS and Android.

**Essential Studio for Xamarin** Stunning controls for building cross-platform mobile apps with Xamarin.Forms, Xamarin.iOS, and Xamarin.Android.

Chart	High-performance charting component featuring 17 chart types, interactive legends, and multiple axes.
Treemap	Simple, effective control for visualizing flat or hierarchical data.
Circular Gauge	Visualize numeric values on a circular scale with customizable frames, range indicators, and more.
Digital Gauge	Render alphanumeric information in segmented or dot matrix displays.
Linear Gauge	Fully customizable visualization for numeric values on a linear scale.
Barcode	Control for generating one-dimensional and two-dimensional bar codes.
File Formats	Read and write Excel worksheets, Word documents, and PDF files within your mobile app, on any device.
Busy Indicator	Features 10 built-in animations for indicating ongoing processes in an app.
Range Slider	Interactive control for selecting a range of values from a larger set.

**Essential Studio for Android** Native toolkit for building Android applications that supports Eclipse and Android Studio.

Chart	Visually stunning chart control with more than a dozen chart types, from simple bar charts to sophisticated financial charts.
Circular Gauge	Plot numeric values on a circular scale with range indicators, multiple scales, and different frame styles.
Digital Gauge	Display alphanumeric information on segmented or dot matrix displays.
Linear Gauge	Visualize numeric information on a linear scale with custom state indicators, labels, and scale intervals.

Treemap	Provides a simple yet effective way of organizing flat or hierarchical data.
Range Slider	Allows users to select a range of values from a larger set.
Busy Indicator	Notifies end users of ongoing processes with one of 10 built-in animations.

## Essential Studio for iOS Enterprise-class toolkit for developing iOS apps.

Chart	Feature-rich chart control with more than a dozen chart types.
Circular Gauge	Plot numeric values on a circular scale with range indicators, multiple scales, and different frame styles.
Digital Gauge	Display alphanumeric information on segmented or dot matrix displays.
Linear Gauge	Visualize numeric information on a linear scale with custom state indicators, labels, and scale intervals.
Treemap	Control for efficiently organizing flat or hierarchical data.
Range Slider	Control enabling users to select a range of values from a larger set.
Busy Indicator	Notifies users of ongoing processes within an app.

## Essential Studio for WinRT More than 40 unique controls for use in modern Windows applications, many of which are compatible with universal Windows apps.

Grid	Built from scratch to provide the best performance on the WinRT platform, even on low powered ARM and Atom devices.
Chart	High-performance, visually stunning charting component that is easy to use.
Gauges	Linear, digital, and radial gauges provide a variety of ways to display data in your apps.
Diagram	Interactively design diagrams, and dynamically build workflows and hierarchies from data.
File Formats	Native libraries for generating Word, Excel, and PDF documents on the fly. Also includes a native PDF viewer component.
Report Viewer	RDL report viewer capable of exporting reports to several formats.
Layout	Tile view, carousel, grid splitter, accordion, and ribbon controls.
Notification	Busy indicator and hub tile controls for providing end users with dynamic updates.
Editors	Rich-text editor, native type editors, sliders, pickers, and more allow you to create intuitive data input forms.
Maps	Build great reports with heat and bubble maps quickly and easily with built-in support for Bing Maps, OpenStreetMap data, and ESRI shapefiles.
Schedule	Touch-friendly scheduler with advanced capabilities like recurring appointments and multiple resource views.

**Essential Studio for Windows Phone** More than 30 controls for enterprise Windows Phone applications, many of which can be used in universal Windows apps.

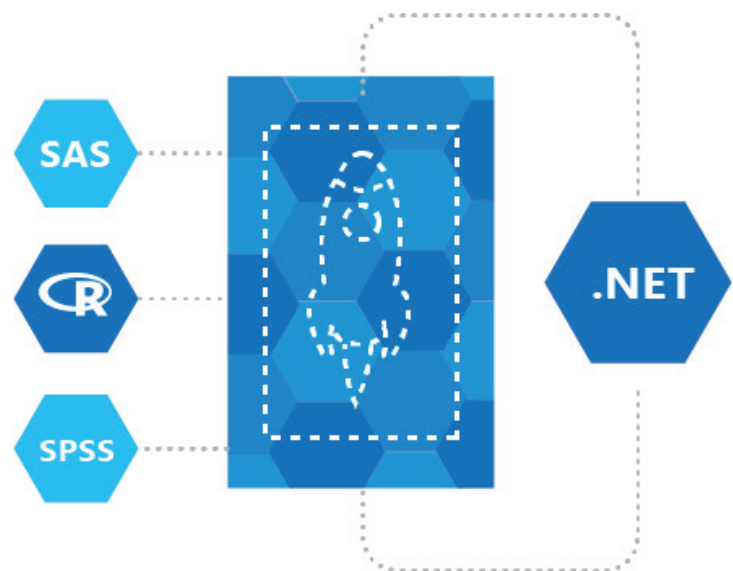

Chart	High-performance chart control with charts ranging from simple bar charts to complex financial charts.
Gauges	Linear, radial, and digital gauges for visualizing qualitative or quantitative data.
Editors	Various text boxes, sliders, and pickers with the Windows Phone look and feel.
Navigation	Tree navigator and radial menu controls for building sleek navigation UI.
Layout	Tile view and carousel controls for navigating through app content.
File Formats	Libraries for reading and writing Word, Excel, and PDF documents within Windows Phone apps.
Treemap	Control for efficiently organizing flat or hierarchical data.

## ESSENTIAL PREDICTIVE ANALYTICS

Deploy predictive analytics solutions within .NET applications.

In today's data-driven world, the most successful companies are those that utilize available data to make timely data-driven decisions. With Essential Predictive Analytics, you can harness data of any size and scope, and quickly transform it into a valuable resource.

- Evaluate millions of data points in minutes.
- Use your existing information to create models using R, SAS, or SPSS.
- Serialize those models in Predictive Model Markup Language, then deploy them in .NET applications.

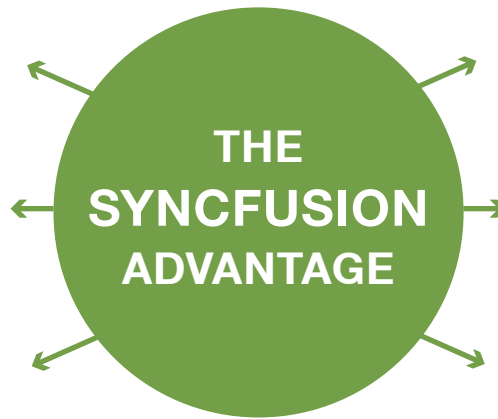

Essential Predictive Analytics is included with Essential Studio Enterprise Edition. As with Essential Studio, there are absolutely no deployment fees, whether you deliver to a small group of users or to millions around the world.
